Subject: RE: Gold King Blowout - need for IMT/RSC members

Ok this is my last attempt at emails tonight ☺

RICT, I wanted to say thanks for all your assistance – in the EOC and with the IMT contacts and support in general! Also, wanted to relay that IMT members typically coordinate with their supervisors on deployments but, if you're able to relay to your management teams that these requests will be coming, that will help greatly.

Regards, Gina

Good Evening RICT Members,

Thanks to all of you for your assistance on this GKM incident

Hello RICT Members,

Due to technical difficulties with our RSC database, we are lacking contact information for many IMT/RSC members. Yet, the GKM situation continues to expand and we need to get in touch with these folks to assess their ability to deploy to Durango (we are expected to deploy a full IMT to the incident) and/or the EOC. When you get this email, could you please contact Tina Artemis (Personal Phone/Ex. 6 email) or Luke Chavez (Personal Phone/Ex. 6 email) to relay the contact information to any of our staff on the IMT list attached. We apologize for this scramble but greatly appreciate your assistance!!

Regards, Gina

Subject: Gold King Blowout - need for IMT/RSC members

Hello RICT Members,

As you know, EPA is responding to the Gold King Mine Blowout. Some background:

On August 5, 2015, EPA was conducting an investigation of the Gold King Mine. The intent of the investigation was to assess the on-going water releases from the mine and to treat mine water and to assess the feasibility of further mine remediation. The plan was to excavate the loose material that had collapsed into the cave entry back to the timbering. During the excavation, the loose material gave way, opening the adit (mine tunnel) and spilling the water stored behind the collapsed material into Cement Creek, a tributary of the Animas River.

Initial estimates are that the release contained approximately one million gallons of water (estimated from the dimensions of the mine adit) that was held behind unconsolidated debris near an abandoned mine portal. There were several workers at the site at the time of the breach, all were unharmed.

We have stood up the EOC and have already called in initial IMT/RSC members to assist. We are currently filling Finance, Logistics, Planning, Public Information and Operations sections, along with units/teams under those sections. Because this incident is ongoing, the EOC will be open over the weekend to support operations in the field and we expect this effort to continue into next week. Thus, we will be contacting various IMT members to help us manage this incident. Attached is the most recent IMT roster along with ARAs to give you an idea who may be called (we're still working out our staffing plans so please bear with us as this comes together).

If you have any questions, you can contact me or Martin Hestmark.

Thanks for your support, Gina
